

Radioactive Material Findings for Agricultural and Livestock Products (announcement no. 335)

October 31, 2025

1 Test Results of Agricultural Products

| Food tested |         | Area                     | Sampling date | Testing Institute                                                 | Results 【Radioactivity (Bq/kg)】 |           |
|-------------|---------|--------------------------|---------------|-------------------------------------------------------------------|---------------------------------|-----------|
|             |         |                          |               |                                                                   | Cs-134                          | Cs-137    |
| 1           | Pumpkin | Farm in Akiruno City     | Oct. 23, 2025 | Tokyo Metropolitan<br>Agriculture and Forestry<br>Research Center | ND (<4.3)                       | ND (<4.2) |
| 2           | Potato  | Farm in Hinohara Village | Oct. 23, 2025 |                                                                   | ND (<3.6)                       | ND (<3.8) |
| 3           | Rice    | Farm in Hachioji City    | Sep. 24, 2025 |                                                                   | ND (<3.9)                       | ND (<3.8) |

※ The guidance level for radioactive cesium in agricultural products is 100Bq/kg for cesium-134 and cesium-137 combined (agricultural, forestry, and fishery products are categorized in the food group "general food products")

※ "ND" indicates that levels were less than the detection limit (minimum level able to be detected) in analyses conducted by the testing institutions. The figure in ( ) is the detection limit.
